The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 8, 9, and 11, are rejected under 35 U.S.C. 102(b) as being anticipated by Shi et al (U.S. Patent 5,693,956).

Shi et al discloses a method of fabricating an organic light emitting diode device, comprising providing a substrate 14 having an organic light emitting diode unit 12 thereon (Figure 1, and Column 2, lines 33-36), forming a passivation layer 30 on the substrate to cover the organic light emitting diode unit (Figure 1, and Column 3, lines 12-17), wherein the passivation layer is formed of either silicon nitride or silicon oxide (Column 3, lines 17-20), and providing an ion beam such as sputtering to perform surface treatment on the passivation layer (Column 3, lines 17-21).

Claims 3, 5-7, 10, and 12-14, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
